PROFILE & SKILLS

Software Engineer II focused on **Java/Python backend services**, microservices, test automation, and CI/CD. Experience in **Playwright**, Cypress, Selenium, TypeScript, **Docker**, **Kubernetes**, GitHub Actions, Azure DevOps, API testing with Postman, Grafana, Cortex, and OpenLens. I use **Claude and Codex** for AI assisted development, accelerating test creation and strengthening **code quality guardrails**.

Software Engineer II | Datasite | 2025 – Present

- Contributed to the **Java/Python** core document-processing engine, achieving a **99.5% successful processing rate** for supported documents.
- Built an **AI Playwright test creation skill** using Playwright MCP and internal MCP tools, reducing test creation and validation time by **45%** - strengthened Claude and Codex agent guardrails to improve output reliability and code quality.
- Integrated test automation with **CloudBees** and independently automated production deployment validation, reducing engineering review time by **~80%**.
- Improved an **AI troubleshooting skill** spanning Grafana, Loki, Cortex, and internal tools, streamlining cross-system diagnosis. This helped to identify issues root cause much faster.

QA Engineer | Konrad Group | 2023 – 2025

Integrated automated test scripts into GitLab and Azure DevOps pipelines, improving delivery efficiency by 25%. Validated solutions built in Adobe Experience Manager (AEM) and Adobe Marketo, collaborating with developers, designers, and product managers to strengthen quality across the SDLC.

Associate QA Engineer | Konrad Group | 2022 – 2023

Supported web application testing through regression coverage, QA documentation, and early automation framework development.

RPA Developer | Lanshore | 2022 – 2023

Developed UiPath automations to streamline enterprise processes and reduce manual work, while supporting Orchestrator, Studio, and Assistant environments.

Technical Support Engineer L3 | Tek Experts | 2021 – 2022

Delivered advanced support for Microsoft Azure Cloud Services, including complex escalations, API-level diagnostics, internal documentation, and knowledge-sharing for Level 2 engineers.

EDUCATION

Bachelor of Engineering in Computer Engineering

Costa Rica Institute of Technology (TEC) | 2019 – 2023 | GPA: 80.5

TEACHING & CERTIFICATIONS

- AI for Everyone - *Instructor*, University of Costa Rica (UCR) | 2026
- [Communication in Tech](#) - *Workshop Facilitator*, Technological Congress UTN | 2025
- [Generative AI for Everyone](#), by Andrew Ng | 2026
- [ISTQB Foundation Level](#)
